

Stainless Steel Floats

We manufacture floats in SS, Alloy20, Hast alloy and Titanium material used in different applications, horizontal and vertically mounted as per customer's requirement.

Our stainless steel floats are ideal for many industrial applications, including:

- Float switches
- Float valves
- Liquid level sensors
- Sump pump switches
- Steam traps

We offer stainless steel float balls and tank floats of the highest quality, and can produce any type of floats to fit your needs.

Many liquid level floats shown in this catalog are in stock for immediate shipment in limited number. Ask about quantities required to tool for special sizes, configurations or material. Finish on all parts is as-drawn and welded, except where noted. Electro-polishing and annealing are some of the finishing options.
